CONCEPT · NOT LIVE · All services operational

Service Operations Overview

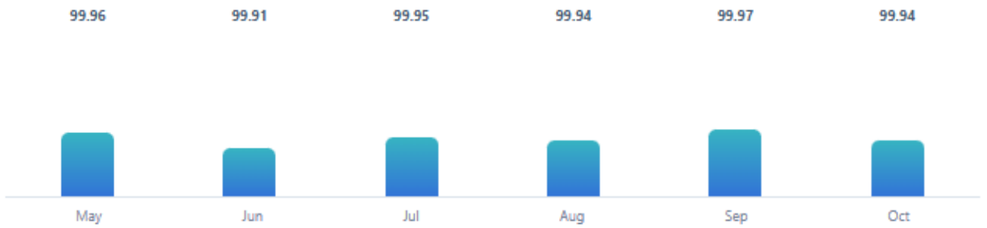

Service performance, live workload, change risk and improvement actions in one management view.

Reporting period: This month · Export review pack

Active incidents	SLA at risk	Service availability	Changes this week
12	7	99.94%	18
3 high impact · 2 major incident	Due within 24 hours · 2 unowned	Rolling 30 days · agreed SLO 99.90%	16 successful · 1 backed out · 1 pending

Service level and experience trend

Monthly view · scope: Core Platform

• Contractual response 96.8% • Contractual resolution 94.2% • User satisfaction 4.6 / 5

Service health by offering

4 tracked services

Health score combines availability, SLA, open incidents and open risks. Click through to component evidence before acting.

Priority work requiring attention

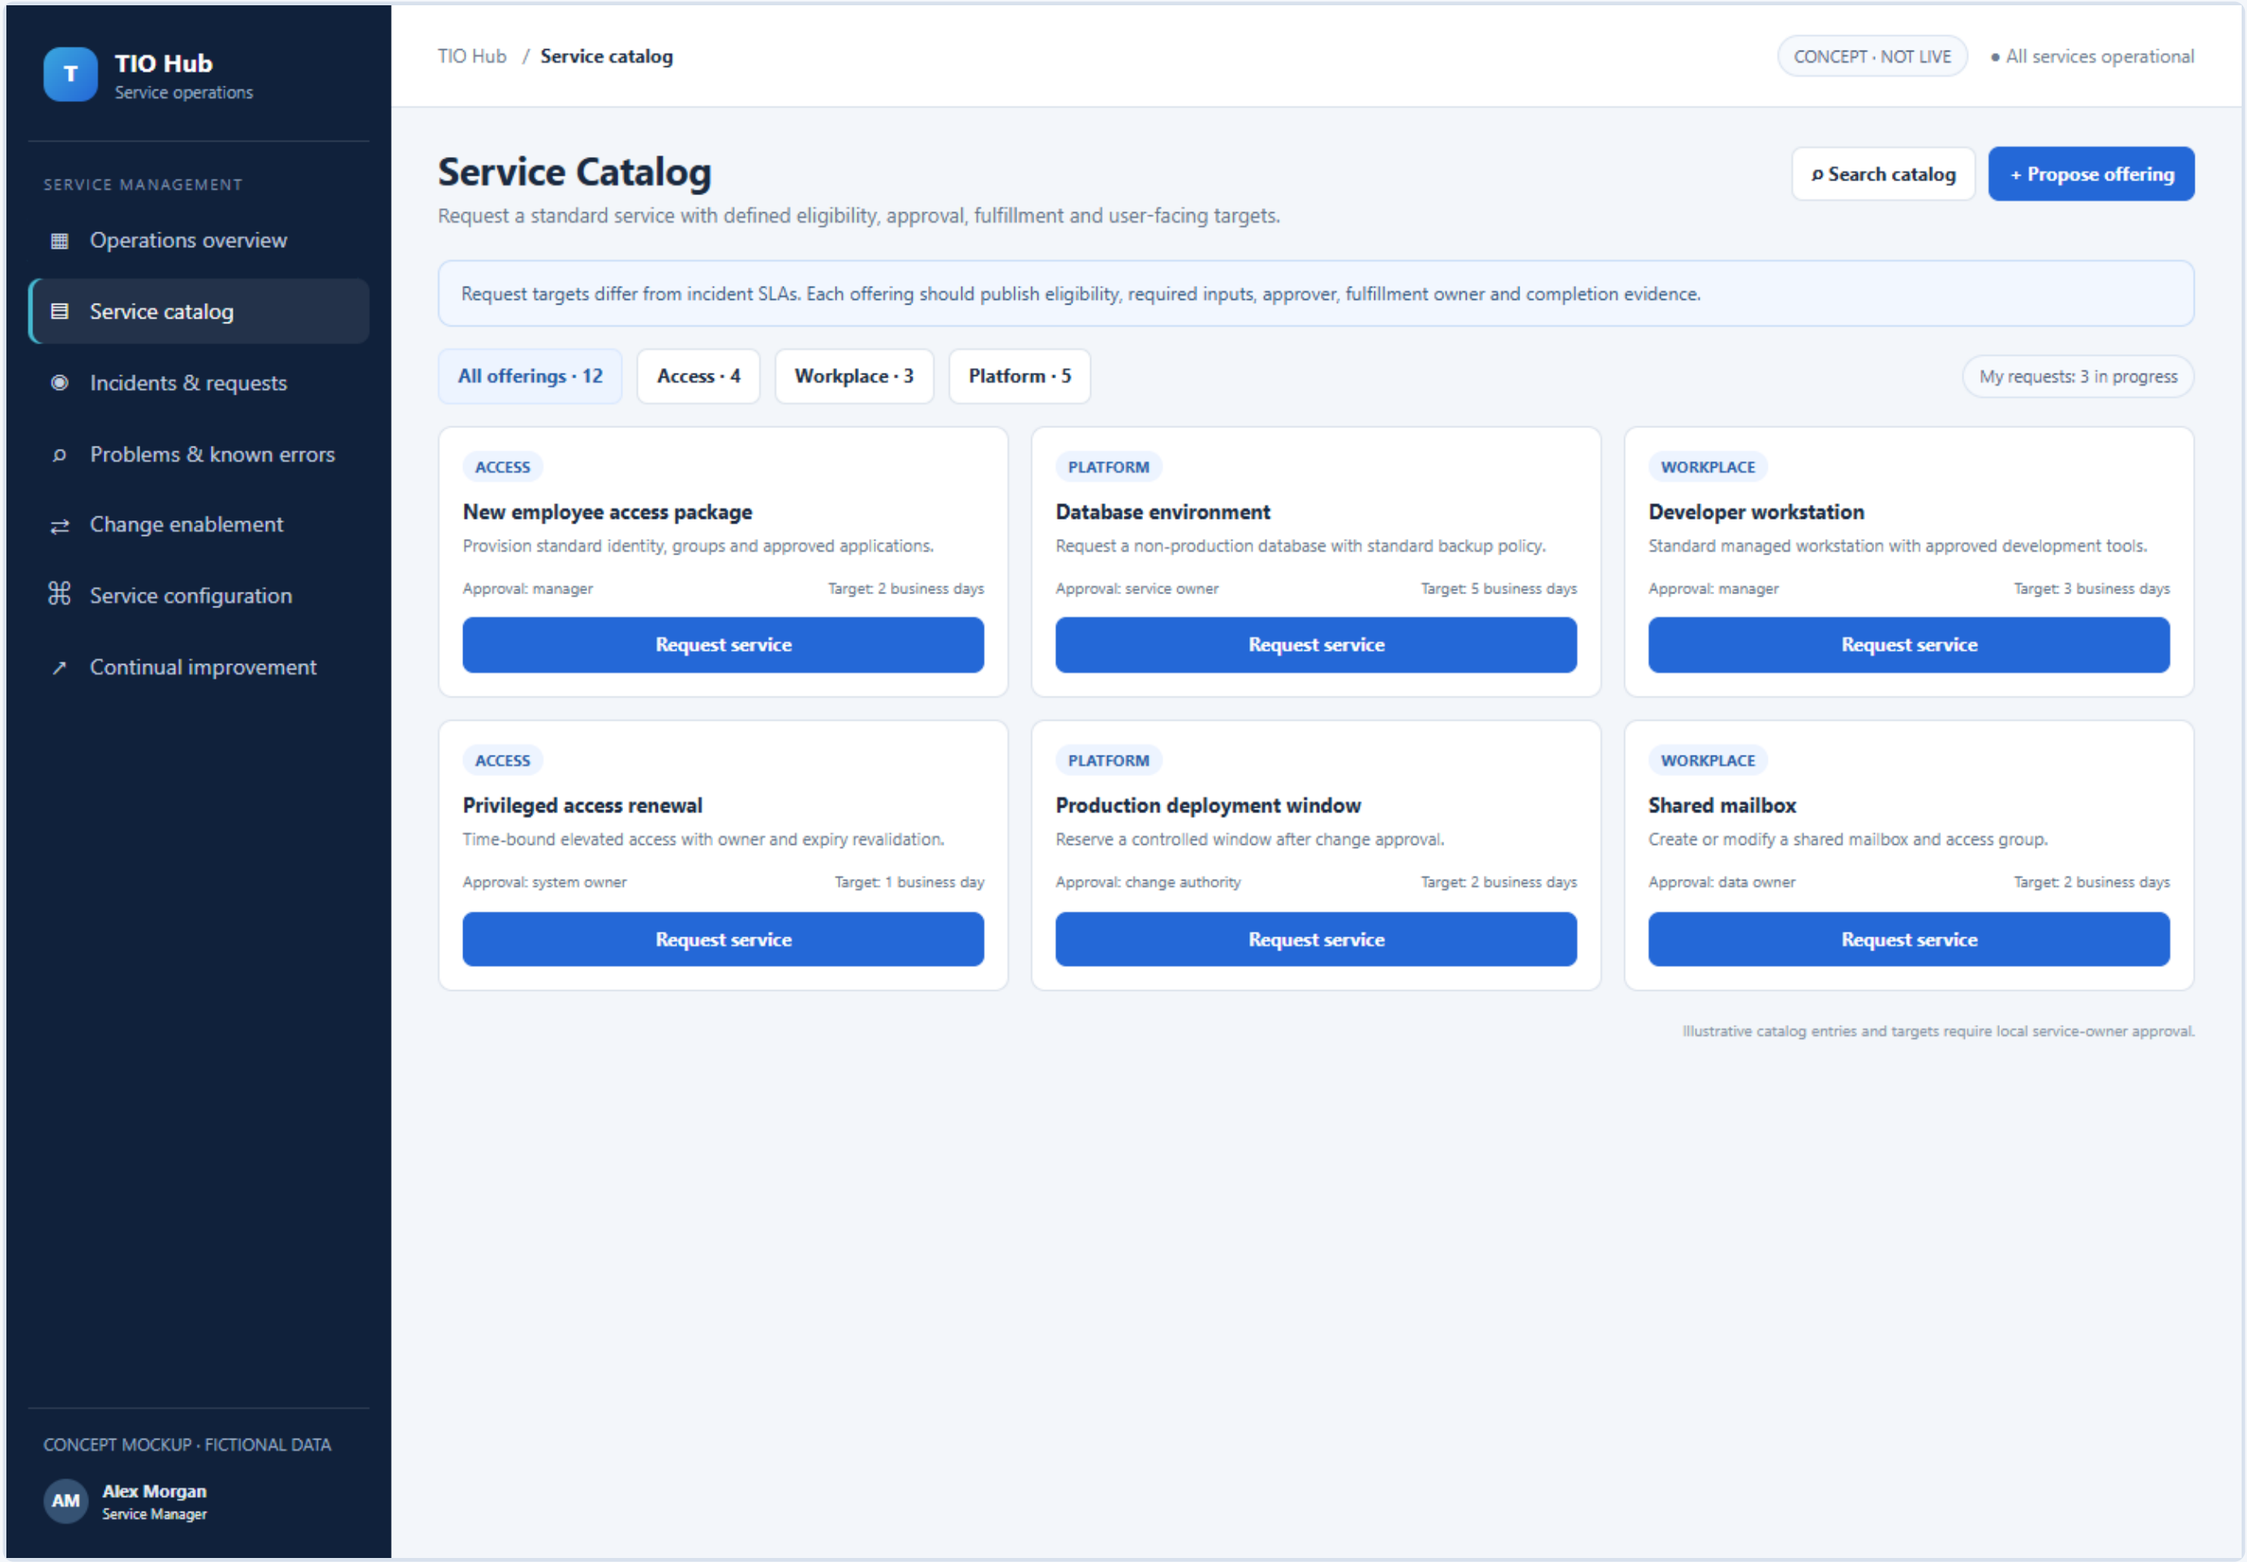

6 of 19 open actions

REFERENCE	SERVICE	WORK TYPE	SUMMARY	OWNER	SERVICE TARGET	STATE
INC-2481	Data Exchange	Major incident	Delayed partner transactions	R. Patel	Response due in 18m	At risk
CHG-0914	Core Platform	Normal change	Database index maintenance	M. Chen	Window starts 22:00	Awaiting approval
PRB-0312	Data Exchange	Problem	Recurring partner timeout	A. Morgan	Review due today	Investigation

Conceptual metrics and fictional records. Not product telemetry.

Service Catalog

Customer-facing service offerings with ownership, service targets and request initiation.

Incidents & Service Requests

Operational queue with impact, priority, ownership, response targets and major-incident coordination.

CONCEPT · NOT LIVE · All services operational

Incidents & Service Requests

Separate interrupt-driven restoration from planned user-request fulfillment.

Filters · 4 active | + Log incident

Incidents 12 | Service requests 31 | Major incident room 2

MI-0042 · Data Exchange degraded Customer transaction backlog rising. Incident lead: R. Patel · next update due 14:30 GST · workaround available. — Open command

REF	TYPE	PRIORITY	SUMMARY	SERVICE / IMPACT	ASSIGNEE	RESPONSE SLA	STATUS
INC-2481	Major incident	P1	Partner transactions delayed	Data Exchange · 4 clients	R. Patel	14:18 · 18m	Investigating
INC-2480	Incident	P2	Intermittent identity latency	Identity Gateway · 1 client	S. Ali	Met · 13:42	Monitoring
REQ-4421	Service request	—	Provision reporting role	Reporting · 1 user	J. Wong	Due 16:00	Approval pending
INC-2475	Incident	P3	Scheduled export failed	Reporting · 1 team	Unassigned	Not yet due	New

Incident lifecycle

Configurable state model

Logged → Triaged → Assigned → Restoring → Resolved → Closed

Impact × urgency drives priority. Capture workaround, resolution code, affected service and user updates.

Major incident roles

MI-0042

Incident commander	R. Patel	Assigned
Technical lead	M. Chen	Assigned
Communications	L. Gomez	Update due

Concept only. No live integrations, notifications or customer communications are sent.

Problem register with known errors, linked incidents, root-cause analysis and corrective actions.

Problem Management

Connect recurring incidents to root cause, known errors, workarounds and corrective actions.

My queue · 5 | + Register problem

Open problems	Recurring incidents	Known errors	Corrective actions overdue
9	6	4	2
4 under investigation	Across 3 services	2 with active workaround	Owner review required

Problem register

Review cadence: weekly

PROBLEM	LINKED INCIDENTS	SERVICE	ROOT-CAUSE STATUS	KNOWN ERROR	OWNER	NEXT REVIEW
PRB-0312	INC-2481, 2430, 2398	Data Exchange	Hypothesis testing	KE-0081	A. Morgan	Today
PRB-0309	INC-2410, 2402	Identity Gateway	Evidence review	—	S. Ali	24 Oct

PRB-0312 · Investigation canvas

Open

Problem statement

Intermittent partner timeout creates duplicate retries and delayed settlement.

Root cause

Under investigation · evidence confidence: medium

Workaround

Queue replay after partner endpoint stabilizes.

Permanent fix

Circuit-breaker configuration change · CHG-0921

Add investigation update

Root-cause chain

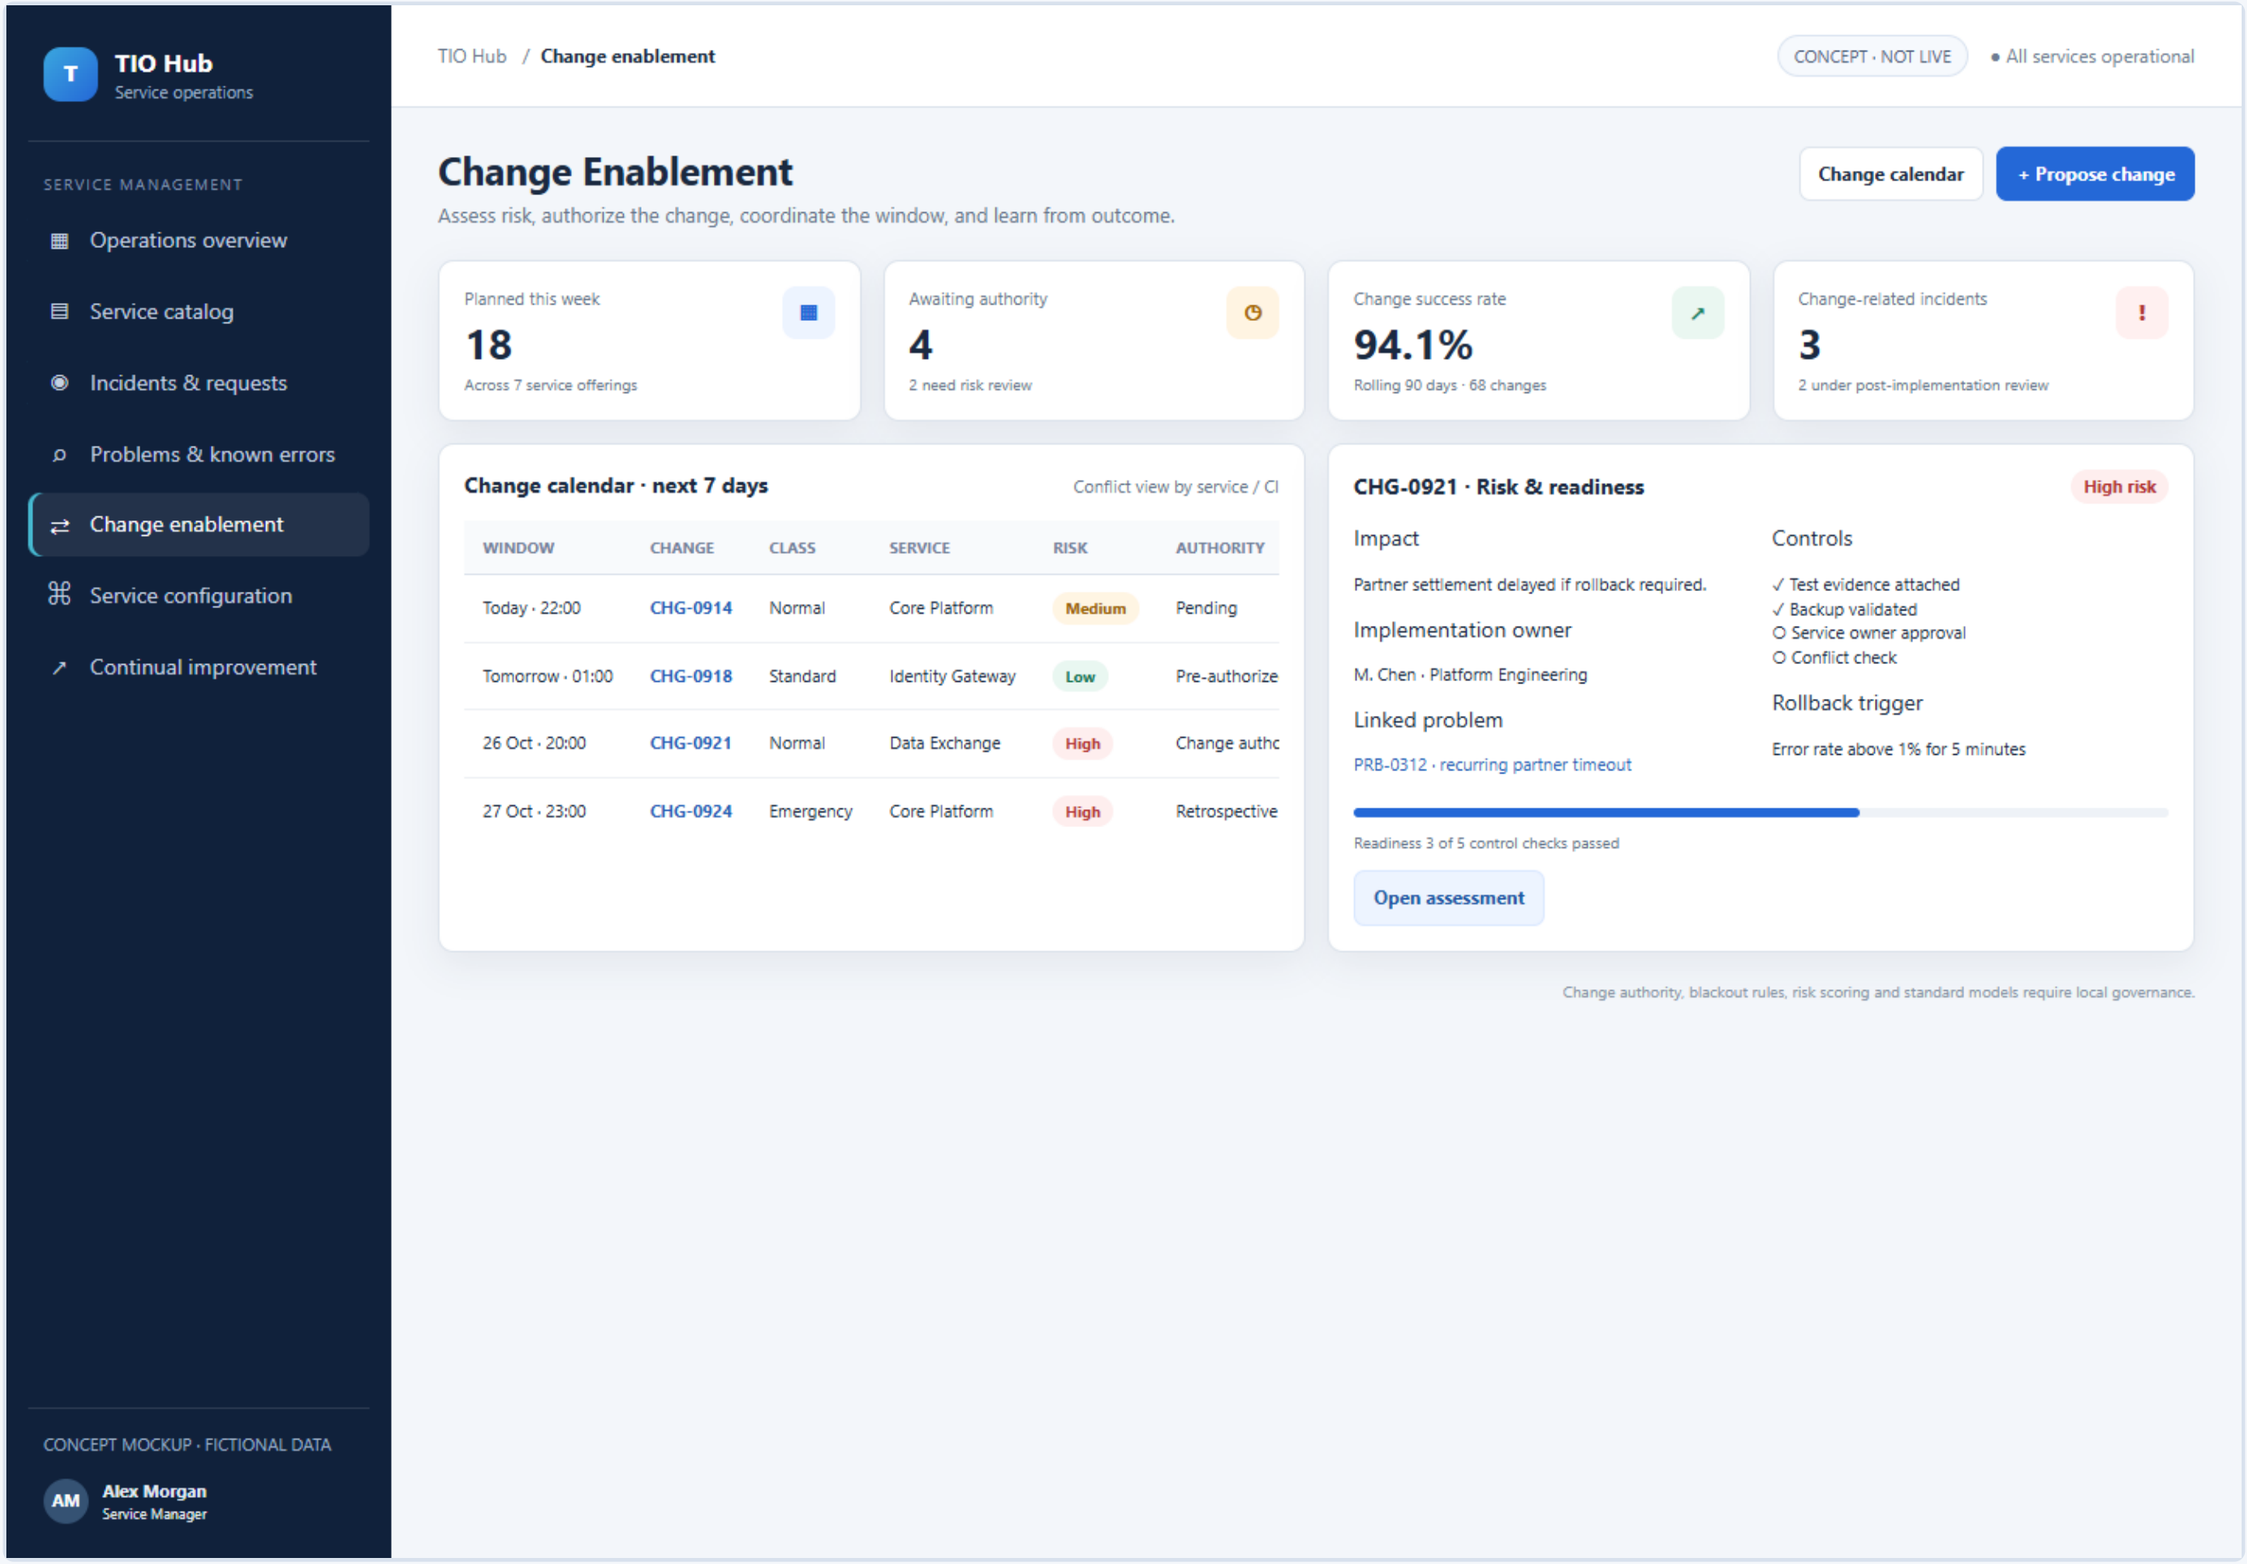

Evidence-linked

- 13:54 **Trigger observed** — Partner latency increased · monitoring event EVT-9231
- 14:02 **Retry queue saturated** — Evidence: queue depth and duplicate transaction sample
- 14:12 **Mitigation applied** — Rate limit enabled · linked incident INC-2481

Concept distinguishes root-cause investigation from the incident restoration workflow.

Change Enablement

Change risk, approvals, readiness evidence, implementation windows and post-change review.

Service Configuration Map

Service-to-component relationships for impact assessment and dependency-aware response.
