Customer Case Study - Evidence Capture Template

TIO OPERATIONS HUB / CONTROLLED DOCUMENT

TIO-MKT-002 | 2.0	**ISSUED | 24 OCTOBER 2026**

Control field	Controlled value
Document ID	TIO-MKT-002
Version / status	2.0 / Blank research template - not approved for publication
Classification	Customer-confidential until written release approval
Owner / approver	Marketing (proposed) / Customer, Product, Legal, and Brand (pending)
Issue date / review	24 October 2026 / Each use
Evidence baseline	No customer story or outcome evidence supplied
Supersedes	Initial case study template dated 24 October 2026

> Do not populate with identifiable customer information or publish until the customer approves the exact copy, data, quote, logo, screenshots, channels, geography, term, and named approver in writing.

1. Publication approval record

Field	Required entry
Customer legal entity and authorized approver	[ ]
Final copy version and format	[ ]
Quote, name, title, organization	[ ]
Logo/image asset source and permissions	[ ]
Channels, geography, publication term, reuse	[ ]
Confidentiality and privacy review	[ ]
Product, security, legal, and brand review	[ ]
Written approval reference and date	[ ]
Withdrawal/expiry contact	[ ]

2. Customer and deployment context

Organization/industry/geography (approved): [ ] TIO Hub version and deployment model: [ ] Teams, locations, records, users and scope: [ ] Observation period and inclusion/exclusion rules: [ ] Data migration, integrations, configuration and support provided: [ ] Existing systems/processes and limitations: [ ]

Identify whether each fact is customer-provided, system-derived or independently verified. Distinguish manually maintained data from automated system behavior.

3. Challenge, objectives, and method

Customer-approved problem statement: [ ]

Agreed objective and baseline: [ ]

Measurement design: Define period, population, numerator, denominator, exclusions, sample, source, owner, and validation method. If comparing before and after, document material process or population changes and avoid causal claims unsupported by the design.

4. Results register

Measure	Baseline	Observation	Definition / denominator	Source/date/validation	Approved wording
[ ]	[ ]	[ ]	[ ]	[ ]	[ ]
[ ]	[ ]	[ ]	[ ]	[ ]	[ ]

Do not use demo screenshots, anecdote, dashboard totals or internal estimates as customer outcome evidence. State uncertainty and limitations.

5. Narrative draft

Headline: [Evidence-based, customer-approved statement]

Challenge: [Customer-approved context and baseline]

Approach: [Verified implementation and operating responsibilities]

Outcome: [Measured result with scope, method, period and limitation]

Customer quote: [Exact approved wording only]

Attribution: [Name/title/entity - permission confirmed]

6. Fact-check and release gate

Confirm product release/features with Product and Engineering; metrics trace to an approved source; sample and definitions are stated; no unsupported ROI, uptime, integration, certification or compliance claim appears; all logos, quotes, screenshots and data have rights; personal/confidential information is minimized; customer, legal, privacy, security, brand and sales approvals refer to the final proof; publication expiry and withdrawal route are recorded.

7. Revision history

Version	Date	Change	Approval
1.0	24 Oct 2026	Initial blank template	Not approved
2.0	24 Oct 2026	Added evidence provenance and explicit release approval controls	Customer and legal approval required
