TIO Hub Terms of Service - Drafting Template

TIO OPERATIONS HUB / CONTROLLED DOCUMENT

TIO-LEG-001 | 2.0 **ISSUED | 24 OCTOBER 2026**

Control field	Controlled value
Document ID	TIO-LEG-001
Version / status	2.0 / Non-operative legal drafting aid
Classification	Confidential legal/commercial working draft
Owner / approver	Legal counsel (required) / Authorized contracting entity (required)
Issue date / review	24 October 2026 / Each negotiation and law/product change
Source baseline	Product and deployment boundaries reviewed 24 October 2026
Supersedes	Initial terms drafting template dated 24 October 2026

> **Not an offer, legal advice, or approved agreement.** The provider entity, customer, jurisdiction, price, warranty, liability, support commitments, data roles, and execution terms have not been supplied. Do not publish, present as binding, or accept customers using this text without qualified counsel review and authorized approval.

Drafting instructions

Replace each bracketed item from an approved source; do not leave unresolved alternatives in an executed agreement. Counsel must reconcile this document with the order form, data-processing addendum, security schedule, service-level schedule, third-party notices and applicable law. If the customer-managed deployment makes the provider's role different from the product assumption, revise the allocation explicitly.

1. Parties, effective date, and order of precedence

This agreement is between `[Provider legal entity, registration number, jurisdiction and address]` and `[Customer legal entity, registration number, jurisdiction and address]`, effective `[date]`. The order of precedence among this agreement, order form, statement of work, data-processing addendum, service-level schedule and security schedule is `[counsel-approved order]`.

2. Service and deployment description

The order form identifies TIO Hub version, enabled features, deployment location, hosting and operational parties, support services, users, environments, data boundary and acceptance criteria. Unless expressly agreed, the software provides operational records and workflows. It does not automatically monitor customer infrastructure, synchronize Jira, retrieve secrets, send email, settle penalties or provide public multi-tenant SaaS as documented in the current baseline.

3. License, access and authorized users

Permitted use, user metric, territory, term, restrictions, suspension, identity requirements and usage limits: [counsel/order form]. The parties document the approved sign-in, access policy, business visibility, administrative roles, export rights and user lifecycle. Customer identifies authorized users and promptly requests changes; provider/operator responsibilities for account administration are stated in the order form.

4. Customer data and responsibilities

Customer determines what information is entered, its lawful basis, accuracy, classification and permitted use. The parties agree responsibility for migration, record ownership, support, backup, retention, exports, access reviews, incident response, deletion and data return. Users must not enter credentials or secrets into ordinary operational records. Data controller/processor roles and processing instructions are defined in the DPA, not inferred here.

5. Fees, taxes, and payment

Fees, currency, taxes, invoicing, payment, late charges, renewal and dispute terms: [approved order form and counsel].

6. Support, availability, and recovery

Support coverage, response/restoration objectives, maintenance, availability measurement, RPO/RTO, incident communication and any credits apply only if stated in an executed schedule. No uptime percentage, response promise or service credit is created by this template.

7. Security, privacy, and assurance

The parties identify applicable security measures, data locations, operators, subprocessors, incident contacts, audit evidence and processing obligations in approved schedules. No certification or independent audit result is represented by this drafting template. Disclosure rights and security review access must be agreed.

8. Intellectual property and third-party materials

Ownership, license scope, third-party notices, customer feedback, deliverables and use of customer marks: [counsel-approved terms]. Confirm rights for logos, screenshots, fonts, maps and other included assets before publication or redistribution.

9. Confidentiality and publicity

Define confidential information, permitted use, safeguards, exclusions, compelled disclosure, retention and return. No customer name, logo, quotation, metric or case study may be published without written approval specifying copy, channels, term and territory.

10. Warranties, indemnity, liability, and remedies

All representations, warranty scope/exclusions, indemnities, liability cap, excluded damages, claim process and remedies: [counsel-approved provisions]. Do not infer legal warranties or limits from technical documentation.

11. Term, suspension, termination, and transition

Define duration, renewal, cure periods, suspension authority, termination rights, transition support, export window, deletion, backup handling and surviving obligations: [ ].

12. Governing law and dispute process

Governing law, venue, escalation, mediation/arbitration and language: [jurisdiction and qualified counsel approval required].

13. Notices and execution

Provider notices: [ ]; Customer notices: [ ]. Authorized signatories and authority evidence: [ ]. Effective date: [ ].

14. Legal approval checklist

Confirm legal entities and authority; jurisdiction and enforceability; service description/version; data roles and DPA; security and privacy schedules; support/SLA/recovery; fees/tax; IP/third-party rights; confidentiality/publicity; liability/indemnity; termination/data return; governing law; order of precedence; and final execution proof.

15. Revision history

Version	Date	Change	Approval
1.0	24 Oct 2026	Initial drafting template	Not approved
2.0	24 Oct 2026	Rebuilt with explicit contractual topics and completion controls	Counsel approval required
